"Mr. Tomlinson is the greatest living master of tersely comprehensive description. Of this proofs abound in 'The Day Before'—a tramp, the interior of a docker's house during a

strike, the East End insurance agent collecting 'pennies to ensure burials with dignity for people from whose lives it had been absent,' the news-editor of a halfpenny daily to whom 'what was cock-eyed was news.' He is not equally master of the novelist's technique. He is weak at—the films have a word for it—continuity. But in this novel, as if with self-knowledge, he has turned his failing to advantage." Harold Brighouse

"It is beautifully written in a curious extremely sensitive style, which while giving a superficial effect of cuddling, an alliance of dear-old-days sentiment with the Victorian poetic frame of mind, lulls the reader into accepting what is in fact an extremely powerful statement about the England that went to war in 1914. For such a passage as that which describes Kitchener's arrangements for handling the crowds at the Coronation of George and Mary tells you a great deal about the false ease of pre-war England by implication, adds a good deal about Kitchener's character, and gives you a fascinating account of events in Trafalgar Square on a particular occasion. It is a lovely and extremely satisfying book." Anthony West

"That Mr. Tomlinson keeps up the form of telling a story is no great matter, though in so doing he draws attention to the poverty of invention in this book. What is rather disappointing is the unsubstantial character of the philosophy that Mr. Tomlinson snatches from the bare incidents of his narrative; more often than not he sounds only a note of perplexity or dismay. This he does, it is true, in carefully chosen words. His style or diction here does not lack the cultivation of former books of his and it would be an odd reader who did not find high pleasure in it. There is, however, something saddening when mere perplexity or dismay is registered in so cultivated a fashion."

In 1812, when the United States was at war with England, the American frigate Essex was sent to the South seas to raid British commerce. "Lieutenant Toner has kept the skeleton of history for the plot of his novel, surrounding the bare bones with sufficient fiction to give them a semblance of life. The result has some of the awkwardness and artificiality which such hybrids usually exhibit, but there is enough of the sea's essential reality in the tale to lend it a convincing vigor."

TRELOAR, ALAN EDWARD. Elements of statistical reasoning. 261p $3.25 Wiley [19s 6d Chapman]

311.2 Statistics 39-21697

"Among the various statistics texts there is an important, specialized group of books which focus attention on the problems of averages and variation, to the exclusion of any discussion of the problems of index numbers, and seasonal and cyclical fluctuations of time series. Such books are not business books, but their subject matter happens to be the area wherein the greatest recent technical advances have been made. Basically, the approach involves probabilities, and accordingly it is mathematical in nature. A text that endeavors to present the logic of this approach, without pretension as to the adequate coverage of specialized procedures, is [the present volume]. . . This book is not a philosophic discussion, but a book on method, with special emphasis on the topics of theoretical frequency distributions and tests for significance of statistical differences." "This statistical study of 10,000 inmates of penal institutions in Illinois furnishes fairly complete data on relationships between intelligence and such factors as race, physique, type of crime, recidivism, and socio-economic status. Psychological tests which make comparisons possible indicate that feeblemindedness in the institutional group coincides to a striking degree with that of the army draft group in Illinois. These results strengthen the arguments of those who believe that the role of intelligence as a direct cause of criminality has been greatly overemphasized." (Survey) Lithoprinted.

"The study is based upon an unusually large sampling of convicts. It is a contribution to research only in the sense that it corroborates, in general, the findings of Goring, Murchison, and others. The Gluecks in their followup of Five Hundred Criminal Cases, have treated the psychological factors discussed with much deeper psychological insight. Tulchin's study does not begin to approach Goring's for meticulous and critical attitude. All this is a comparative matter, however, and the general reading public of penologists and social workers should profit by this additional emphasis that both 'crime' and 'intelligence' are generic terms and bear no simple causal relationship." TURTON, WILLIAM. Men without doubt. 251p $2 Houghton

40-33711

While driving thru Germany in 1933, Jack Pointer, an English civil service man, on his way home from Palestine, met with an accident. The German baroness who caused the accident invited him to stay in her castle until the car repairs were finished. Almost at once Jack found himself involved in sheltering a young Jewish scientist, married to a close friend of the baroness. From that time there was no peace for Jack until, after incredible difficulties, he and the baroness escaped from the castle and from Germany.

"Although 'Men Without Doubt' is basically a headlong story of Nazi terrorism and the matching of wits with death as the stakes, it has merits aside from sheer suspense and mounting tension. The conflict goes deeper than a mere elemental manhunt, for the characters involved reflect the greater antagonisms fertilized in the soil of Germany after the last war and allowed to sprout unheeded until the Hitler harvest. . . This is an illuminating as well as exciting story." David Tilden

40-34749

"[This] novel is a rich study of the desert Indians of Arizona, of their ways of living and thinking, of the breakdown of their community habits and health once they are in contact with white men. Taking as her central figure a boy who is part Mexican, this novelist tells of the boy's education to follow in his father's footsteps. . . He wants power. When, therefore, he is offered schooling—white man's power—he decides to gain it also. Several years at an Indian school destroys much in him. . . Rafael has, he finds, no life in the Indian community, which now is a picture of contradictions in cultures. . . Slowly Rafael's agony reaches its climax. In his desire to rid his people of the white men whom he considers their enemies, he commits the worst crime known to his own people. When, despite this, they receive him back into the village and protect him from the white man's ideas of justice, he comes finally to see what he must do." N Y Times

"The chief fault with these poems is that they say too much. The earlier work, especially, is flawed by a tendency to overstatement, and by an indifference to the desirability of objectifying the event that is the source of the poem. There is something unhappily feminine, loquacious, and soft about a good many of these pieces. The most recent poems, while less obvious, also are marred by a lack of concentration, and the quaint diction, however suitable to these religious themes, has not been quite mastered. In spite of its technical imperfections, however, as a whole, this stout volume bears witness to the sensitive, ardent and gallant spirit of the woman whose work it is."

The absence of such a book is keenly felt, inasmuch as the instruction in elementary number theory is given in an ever-increasing number of American universities and colleges. With this fact in mind the authors have endeavored to prepare a text carefully restricted to the elementary portions of the subject and yet containing things of sufficient interest to show to undergraduate students the reason for the enthusiasm with which the devotees of number theory approach their subject." "The book as a whole is very well written, though with a certain prolixity in the earlier chapters. An excellent minor feature is the provision of short historical and biographical notes on the mathematicians with whom various famous theorems are associated. "A deeply moving and highly provocative volume. . . Miss Utley's unadorned and sober account of her experiences provides a most illuminating picture of what life in the Soviet capital means to the rank and file of the citizens, even when they belong to the relatively privileged group of foreign 'specialists.' Like her earlier book, 'Japan's Feet of Clay,' it combines the keenest and most comprehensive intellectual understanding with deep and sincere emotion. UTTLEY, MRS ALISON. Traveler in time; il. by Phyllis Bray. 307p $2.50 Putnam [7s 6d Faber]

40-32370

Penelope Taberner Cameron, a young girl of late Victorian days is sent by her parents down from London to an old house in Derbyshire to live with an aunt until she regains her health. Penelope, loving the old house, wanders thru secret passageways and finds herself suddenly back in another age—when Elizabeth ruled England, and Mary, queen of Scots, was her prisoner. In frequent visits with the Babingtons, the former owners of her aunt's home, Penelope witnesses one attempt to rescue Mary.

"By choosing a plot of such obvious romance and excitement, Mrs. Uttley has foregone any extensive philosophic implications. But her story is nevertheless fresh and tantalizing." R. H. Bonner

"The plot is no more than a framework for the book. Its substance is the continued life of Thackers, seen through the eyes of a sensitive, dreaming child. It is exquisitely done: Miss Uttley has captured the peculiar quality of a child's perceptions, the crystal vision, and the satisfaction in the substance of things, the union of acceptance and of wonder. A scholar might question, for instance, the colloquial speech of her Elizabethans: but it simply does not matter, so strong is the magic. We accept the Babingtons and the Aunt Cicely of the fifteen-eighties as we do the Aunt Tissie of three centuries later."

"This small, one-volume encyclopaedia is intended primarily for the use of Jewish readers. The preface states that the field of a Jewish encyclopaedia 'is confined to topics of Jewish interest and to persons of Jewish birth . . . who have distinguished themselves . . . in any field of activity or thought.' Limitations of space have made brief treatment of most topics necessary." Subscription Bks Bul

"In a work of this size the amount of space to be given to any topic is limited; however, all topics of ecclesiastic and sacred nature which one would expect to find in this volume are included and the information given is dependable and accurate. . . The value of Vallentine's Jewish Encyclopaedia is enhanced by the many excellent illustrations, plates and maps contained in the volume. The Encyclopedia of Jewish Knowledge does not contain illustrations and includes fewer and less useful maps. The paper, type and format make the Vallentine volume extremely attractive and it is durably bound in heavy dark blue cloth. Recommended, especially for small libraries."

VALTIN, JAN. Out of the night. 841p $3.50 Alliance bk.

B or 92 (W) 41-51514

Autobiography of a German, son of a respectable Social Democrat employed by the North German Lloyd line. Caught in the disillusionment of the post-war period, he turned Communist and worked with the party for several years as an agitator among seamen. Eventually the Gestapo captured him and he was tortured unmercifully for weeks on end; his wife died in a concentration camp; his son was lost. He escaped and is now in this country. The brutal horrors of the Nazi prison camps are vividly described.

"This long autobiography offers strong raw meat to its readers. It is heavily charged with sex and brutality. The author looks back on a life of constant and often sickening violence, and as a 'red' sailor he is not inclined to mince words. At the same time, it is a work of very considerable public interest and topical importance. No one has told in such circumstantial detail the story of a Communist agitator in foreign lands; and it is a story that is immensely worth telling." W. H. Chamberlin

"Mr. Valtin's book is of such startling character and contains so many secrets of the political underworld, that nobody can confidently assert its accuracy throughout. However, I am told that the publishers have made every effort to confirm those portions of it which are susceptible of confirmation. For the rest, any man who has suffered as this man did must bear the scars in his memory for ever. If he is at times bitter or overemphatic, melodramatic or insincere, the past has given him cause. I believe his story to be, in the main, true, and as pitiful a confession as these tragic years have produced." Vincent Sheean

"'Out of the Night' is as brutal, sordid, violent, horrible and nightmarish as Celine's 'Journey to the End of the Night'; it has in it occasional echoes of the reckless seaman's world mirrored in Traven's 'Death Ship'; and sometimes it suggests the anti-Soviet researches of Isaac Don Levine. How much of it is literal truth I cannot tell. . . As a portrait of the revolutionary soul in torment it has a grim Dostoievskian reality; but the immense accumulation of lurid detail seems almost more than one man could compress into a mere 20 years. That this 'Jan Valtin' has lived among such horrors as he describes seems overwhelmingly convincing; whether all that he recounts actually happened to one man may be dubious." Lewis Gannett

"This is a historical document of the first rank, a biography, an adventure story, and in places, so it seems, a brisk novel. It is all these in one, and in addition the structure and writing are excellent. Before you start to read it you had better plan to take three days off. Its suspense is such that you will not be good for anything else until you have turned the last page. And then you will need time to think and to remember. . . 'Out of the Night' will be misused in many quarters. The red-baiters will eat it up, but that will matter little as long as it is read widely. The fighters of the future will learn from this work many of the fallacies which they will have to avoid. "The author of this autobiography is an extremely skillful writer. What he has seen and done, or even felt, he knows how to communicate in words that sharpen perception and kindle the imagination. Hundreds of personages are introduced, the men and women he worked with, the police-hating prostitutes that sheltered him when he was in flight, some of the men who commanded and some of those who followed him, some whom he hunted and some to whom he was the quarry; and every personage is vividly individualized. The work is as vast in background, as moving, illuminating and humanly significant as a great novel. . . Wherever I could check it against my own first-hand knowledge, the story is exact and truthful. Even the occasional errors are, so to speak, legitimate ones." B. D. Wolfe

"The author's account of the tortures to which he and other prisoners were subjected makes about the most ghastly reading on that grim subject that this reviewer has ever encountered. In general, the author does not mince adjectives in calling a spade a spade, and his book is not for admirers of mid-Victorian reticence in matters of sex and physical brutality, both of which subjects play a considerable part in the book. . . Apart from its value as a dramatic record of personal adventure, Valtin's story casts a flood of light on the international underworld that has grown up in the shadow of the totalitarian dictatorships. . . What is refreshing about Mr. Valtin's book, in contrast to some literature on the 'Red menace,' is that he deals not with generalities and wordy resolutions of the Communist International but with the everyday agent." Everyone must marvel that a man who has lived for twenty years as an active revolutionary, has suffered physical and mental tortures which would have driven most men insane, and whom one would have expected to have been corrupted and broken by his experiences, should have been able to write so noble and sincere a book." Fleming, Marjorie—Fiction (W) 40-6447

Story of Edinburgh and the nearby town of Kirkcaldy in 1810. The episodes are written around the lively little girl Marjory Fleming, the child genius; and excerpts from her poetry are included. For girls of ten to fourteen.

"Any one is looking for trouble and likely to get it who introduces the writings of Marjory Fleming into a story about her. The least scrap from her incomparable fragments refuses to be incorporated with the work of any other hand. If the author struggles to effect this incorporation by changing by so much as a word the recorded utterances of Marjory Fleming to fit into his own story, all the Marjorians will be after him like sabre-toothed tigers. Mr. Van Gelder well may run for his life. . . I admit it is a lively and plausible tale, and that he is beyond doubt under the spell of the peerless child to the point of wanting to give her a little longer on earth and in the hearts of men. . . But Marjory!" M. L. Becker

"In writing 'Marjory Fleming, the Youngest Genius,' Mr. van Gelder has done the clever and correct thing. He has gone through the handful of letters and diary piously edited by Dr. John Brown and others, has found other letters written by friends who knew the child, and has seized upon allusions or 'clues' to conjure up a story. It is such a good story that though it may not have happened, parts of it are certainly very like what was Pet's life, and all of it could have happened."

"This is no hoax program or Jules Verne romance to Van Loon. VIALAR, PAUL. Rose of the Sea; tr. by Warre Bradley Wells. 300p $2.50 Carrick
40-13811

This tale of the sea is essentially a psychological study of a change in a man's attitude toward life and death, good and evil. With his uncle, young Jerome Jardeheu, owns the Rose of the Sea, an old tub hardly fit for far voyaging. After the voyage from Cherbourg to Constanza in the Black Sea has begun, Jerome discovers that evil plans are afoot. At first, if not entirely willing, he is practically indifferent but circumstances arise that finally entirely change him.

"The last Prix Femina before the Invasion has been given to the best novel that ever won it. If this should prove the last award of the prize, it will have gone up in glory. . . The psychological effect of the book is so strong, the speed at which it will be read so high, that the virtuosity of its technique will not at first be noticed. Its effects seem to have been obtained without effort, just as its translation is so good it does not seem translation at all. But a student of style might well examine the methods by which these effects are obtained." M. L. Becker

He is a double-dyed villain, but for all that he is understandable, and he even evokes a mite of sympathy. Even a better man than he, faced with the prospect of sailing the Rose of the Sea for a living, would have been tempted to work the insurance swindle. It is he and the minor characters and the lean, hard, vigorous writing that make this book good, if not very important, reading." Harold Strauss

"Readers who expect an ordinary sea story may be disappointed that, having established a situation of such tension, the author does not solve it with a more romantically happy ending; one half expects prodigies of valor and seamanship and a moving picture rescue. But the author is interested primarily in Jerome's acceptance of responsibility, and that he brings to its right ending. VIAU, JOSEPH M. Hours and wages in American organized labor. 301p $2.50 Putnam

331.81 Trade unions. Hours of labor. Wages
40-27125

"The object of this study is to present an historical survey of the struggles undergone by organized labor in an effort to secure shorter hours, higher wages and more desirable working conditions in American industry. . . This study is limited in time and scope. In time, it dates from the inception of the Knights of Labor in 1868, to the present time. In scope, it must perforce be limited to maximum hours, minimum wages, collective bargaining and the influence of child labor and women in industry on the hour and wage problem." (Pref) Bibliography. Index.

"The book was undoubtedly planned for use as a textbook in Catholic schools and colleges. . . The book is therefore heavily weighted with citations from the speeches of Messrs. Gompers and Green, and the proceedings of conventions of the American Federation of Labor, the pronouncements of the National Association of Manufacturers, and the Encyclicals of Pope Pius XI and Pope Leo XIII. Little use is made of the increasing volume of statistical materials now available. . . Although the treatment is historical, no clear picture emerges of the changing economic fortunes of any one group of workers, or of American workers in general, as the result of legislative and collective bargaining efforts to secure shorter hours and higher wages. The appendix materials presented are not sufficiently dated or documented to be useful. The organization of the material is confusing." G. L. Palmer

VIERTEL, PETER. The canyon. 288p $2.50 Harcourt
40-31346

Told in the first person, this story revives memories of boyhood and adolescence in a southern California town.

"This is a first novel and a skilful one. The gradual unwinding of the story is gently and ably done, and the nostalgia of the end is very moving. The details of a boy's life are uneventful even though they may be magnified in a boy's mind. They may have color or beauty or humor, but they are episodes and there is nothing larger to seize the reader's imagination. Peter Viertel, looking back probably on his own youth as he does on the youth of his hero, has kept his story realistically minor in order to establish its mood. The result is a novel which represents sensitively, almost too faithfully, the monotony of an every-day life." Anne Brooks

"It is hard, even in a long novel, to put one's finger on the exact tricks by which the writer has made his people live and breathe; in a short book like 'The Canyon' real three-dimensional character sculpture would seem to require nothing short of black magic. "For more hundreds and even thousands of years than any one knows or cares to reckon with, the Arabs have been sailing out with the northeast monsoon to Zanzibar in their great lateen-rigged dhows and home again before the southwest monsoon. This ancient traffic along the east coast of Africa is without doubt the oldest commerce in the world still carried on under sail. . . The extraordinary thing is that the remnant of this maritime supremacy still remains in active operation, relatively unchanged during at least two thousand years, and that it constitutes today probably the largest traffic by purely sailing vessels still carried on in the modern world. It is the story of this tremendous living anachronism that Alan Villiers has set himself to tell in the present volume." Books

When young Vincent accepted his Uncle Gus' invitation to visit him, Vincent expected great things, for his uncle was supposedly an important personage in an upper New York State resort. Five days of rain-soaked life at the resort revealed the true nature of Uncle Gus' importance and at the end, Vincent, disgusted and weeping, is yet happy to be on his way home, even tho he has to hitch-hike his way.

"The things that happen in 'The Straw Hat' are brutal and shocking. And they happen casually, for Vogel is of the hard-boiled school that delivers violence and depravity as calmly and laconically as though they were tea-socials or Sunday-school picnics. Were it not that every action and character is filtered through the essential freshness and sensitivity of a healthy-souled young man, 'The Straw Hat' might seem like a callous chronicle of an unsavory way of life. As it is, Vincent's personality blows through the book like a fresh wind through the rank breath of a marsh." Milton Rugoff

"An exceedingly well documented life of Margaret Fuller, told in straightforward prose. . . The book is not a penetrating study so much as a careful recording of available data, and the reader is left to form his own opinion of this extraordinary woman. Not a distinguished volume, but a readable one."

"Sympathetic and well balanced account. Although Mr. Wade pursues a different method and disagrees with some of Miss Anthony's conclusions, his portrait of Margaret the woman, does not differ fundamentally from hers. He has, however, painted her with a wider sweep, with much revealing detail of her relation to all her backgrounds. The pages on the Transcendentalists and Brook Farm, and on the European period, more fully treated here than anywhere else, are especially illuminating. This is a freshly conceived and vital picture of a fascinating and unique woman and the society in which she played a really great part." C. G. Stillman

"An altogether admirable book. [Mr Wade's] triumph is the greater because of Margaret Fuller nothing remains except a legend. Her writings are read, if they are read at all, only by specialists. . . Difficult as it is to write a moving biography of a writer whose works possess some pale immortality, it is even more difficult to write a moving biography of a writer whose works are scarcely known even to students of American literature. This, however, Mr. Wade has beautifully done." H. M. Jones

"This latest Fuller biographer is a young journalist with a good writing record; and he has brought together in a readable timely work a mass of data and quotation. . . With his plethora of material it seems a shame that the magnetic Margaret with her glowing faith and what she called 'the doctrine of the soul' should be no better evidenced. Admirers of the militant nineteenth-century crusader will be glad, nevertheless, for this appearance of interest, the compendious Fulleriana references, and the author's easy style. But, commendable as Mr. Wade's purpose is to bring to life the whole Margaret, he has somehow missed his cue." M. W. Hess

Unfortunately, in steering clear of the grandiloquent, Mr. Wade has almost run aground on the reef of colorlessness, and his life of this passionate and turbulent woman is too cool, too inexpressive, too lacking in boldness to do full justice to her nature or her career."

The thirteen-year-old son of an American army officer is the author. He writes amusingly about his family, their trip by car from Georgia to Florida, his own school days, and what he thinks about youth congresses and his own country.

"Although this is a very amusing book, the author does not seem to be trying consciously to be funny, which is always fatal. He is not a smart aleck, and much of the humor comes from the natural, unforced way that he sets down his thoughts. The Army background, as it comes in, is interesting. All these views, he observes, are therefore of immediate interest to us. This interest is enhanced by the polished and lucid style of Mr. Waley's translations, by the fables and anecdotes with which he illustrates the Taoist and Confucian attitudes towards life and politics and by his own shrewd comments on these attitudes."

940.5 European war, 1914-1918—Influence and results. European war, 1939-. World politics 40-27190

Symposium on the social aspects of modern war. Contents: War in the twentieth century, by Willard Waller; The World war of 1914-1918, by H. E. Barnes; The peace of Paris: Europe between two wars, by W. C. Langsam; The economic war since 1918, by Benjamin Higgins; The World war and the arts, by Frances Winwar; The rise of the Soviet state, by David Krinkin; The rise of Fascism, by Clifford Kirkpatrick; Treaty diplomacy since the first World war, by Lamar Middleton; How the War of 1939 began, by Quincy Howe; Economy in war time, by F. B. Wolf; The state in war time, by Max Lerner; Propaganda and public opinion, by R. D. Casey; War and social institutions, by Willard Waller; The prospects of Western civilization, by Ralph Linton; Index.

"Undoubtedly very useful to the student and the general reader, for whom it seems primarily designed, the book is not equally valuable to scholarly workers in the social sciences, because the dissemination of knowledge and its advancement call for somewhat different methods. Certain portions are over-detailed narratives of matters well known to specialists, while some others are over-general presentations of subjects needing detailed documentation." A. K. Weinberg

WALLIN, JOHN EDWARD WALLACE. Minor mental maladjustments in normal people; based on original autobiographies of personality maladjustments; a casebook for the use of students of mental hygiene, psychology, education, child development, sociology, and the formation of personality traits. 298p $3 Duke univ. [18s Cambridge]

131.3 Mental hygiene. Personality, Disorders of. Psychoanalysis 39-23514

"For some time Wallin has secured case histories from mature students in his courses. He supplied the students with a guide which contained a suggestive list of early personal-adjustment problems. The students were asked to describe their personal maladjustments as accurately as possible and without exaggeration, to try to trace the difficulties to their sources, and to indicate as definitely as possible when and how the maladjustments originated. . . Nineteen chapters are devoted to the various categories under which the autobiographies are discussed. Each chapter contains a statement by the author, a list of references to books amplifying the theoretical background, and the portion of each autobiography which falls under the particular heading. The largest chapter is that concerned with fears or phobias." School R

"No school of thought is specially emphasized, and, except where the subjects have themselves tried to explain their traits, there is little analysis. This fact probably makes the book more useful than otherwise, as it allows the student freedom to try his own explanations. There is hardly a case in the book which is not fascinating, and there are probably few readers who will not find themselves reflected in some of the cases." R. E. L. Faris

"This [monograph on a seventeenth-century English Catholic poet] is the first adequate account of the man and his work that I have seen in English. It opens with a concise chapter on the Laudian movement and the Counter-Reformation: the theological intricacies are rather summarily dealt with, but enough is given for a background. The bias is Anglo-Catholic. The greater part of the book concerns itself with the poetry." (Sat R of Lit) Index.

"The author is much happier in dealing with theology than with poetic perception and style. His volume is overweighted with obsolete rhetorical jargon, and his study of meter is thoroughly pedantic. Here, in the dissection of images, the taking apart of the often almost psychotically extravagant metaphors and other tropes, is the way to the understanding of Crashaw, of a manner of thinking superficially so alien to us that it is something of a shock to discover that fundamentally it is not unlike our own time's Marinism, Gongorism, Eliotism, or what you will." "The author succumbs to two temptations which confront most reformers. When one has sung a song of protest, it is hard to believe that the world has joined in the chorus. Much has happened in colleges in recent years and today many of the accomplishments reported in this book could be matched in institutions which not only admit but boast of their traditionalism. WARREN, LELLA. Foundation stone. 754p $3 Knopf (W) 40-11820

Starting in the 1820s with the marriage of Yarbrough Whetstone and Gerda van Ifort this long family chronicle follows the fortunes of these two and their many dependents in migration from South Carolina to Alabama, thru years of hardship, joy and sorrow, to the Civil war and its immediate aftermath.

The life of pioneers in Alabama, of planters before and during the Civil War, the relationship and life of the Negroes are richly and realistically drawn. Miss Warren writes with perception, with warmth, with humor. 'Foundation Stone' is a thick book, 754 pages, but it is not too long for the tale it tells and the historic pageantry it unfolds. Presents the philosophy of education of a successful educator, who has been superintendent of the Winnetka, Illinois, public schools for twenty years. The Winnetka schools are nationally known for their progressive methods. The author "defines education as the process of helping children to develop in a way that is personally and socially satisfying, and proceeds to show how it can be done through flexible, progressive school methods. The book is enlivened by 'concrete experiences in schools alive with children.' Cyclopedic in scope, it discusses everything from pre-parental education to the right of teachers to recall a superintendent, although it says little about the school library." (Library J) Index.

"Each section of the book has an immense amount of good sense and careful thought, from which teachers, parents and the general public can learn much. WATKIN, LAWRENCE EDWARD. Geese in the forum. 287p $2.50 Knopf
40-11452

Faculty life in a small Southern college town at the end of the prohibition era provides the setting. It is the story of a young Southern professor, John Burgess, married to a rich Northern girl, whose father is a member of the board of trustees of Beauregard. The action is provided by the return of John's early sweetheart, Anne, who has married a show-off professor from a Northern college. John's refusal to be pushed into the president's chair at Beauregard is the match which starts the faculty fire.

"This is a lively, humorous, and well-told narrative, filled with good Southern stories and atmosphere, and very believable, clear-cut *dramatis personæ.* Academic readers will find interesting parallels here and laymen will enjoy the book for its wit and wisdom, without caring very much for its campus setting. All told, an appealing interpretation of the modern South."

If you have read or seen 'On Borrowed Time,' a sentimental fable just this side of homily, you will hardly be prepared for the crackling fireworks in 'Geese in the Forum.' Common to both books is a tight plot structure and a good short flailing sentence; Mr. Watkin is a writer. But the moods, the mental atmospheres of the books, are worlds apart. 943.085 Germany—Politics and government. Germany—Constitutional history 39-25062

"The framers of the Constitution of Weimar were so anxious to protect the values of parliamentary democracy against its enemies and so fearful of legislative delay and judicial timidity that they vested emergency powers in the executive to deal swiftly and surely with anti-democratic revolutionaries, both on the Right and on the Left. 'If public safety and order in the German Reich,' asserted Article 48, 'is materially disturbed or endangered, the president may take necessary measures to restore public safety and order, intervening if necessary with the aid of the armed forces.' . . By this device, it was hoped in 1919, all enemies of the Republic would be thwarted. By this device, in realization in 1933, the Republic was itself destroyed. . . In the name of Article 48 Hitler bludgeoned German democracy to death." Columbia Law R

Watkins' solution is not to abandon drastic emergency powers, which he deems indispensable in an epoch of crises, but to prevent their abuse by requiring concurrent legislative and judicial review of emergency action. His concluding evaluation would perhaps have been more incisive and comprehensive had he familiarized himself with Karl Loewenstein's important studies of comparative legislation in this field. "Professor Watts has covered the long period from the Greeks to the Humanists in a book written in a clear, straightforward style and not overburdened with unnecessary fact. He has, it seems, aimed to be clear and has not been afraid to venture generalization that helps towards this end. . . For beginners, some confusion may arise from the arrangement of the various chapters. 'Mohammedanism and the Crusades,' for instance, follows immediately upon the 'Barbarian Invasions,' whereas 'Feudalism' is not explained until the political history of the major European countries has been presented, thus necessitating a jumping back and forth that is difficult for most students." 536.7 Thermodynamics. Chemical engineering 39-30511

"This treatise deals with 'the more important thermodynamic relations in a manner particularly useful to the chemical engineer.' Especially is this true of the sections dealing with phase relations, generalized P-V-T relations, properties of materials, fugacity and activity, and equilibrium constants. Similarly, it is probable that the chemist and mechanical engineer may find this book of interest for its summary of work of a recent nature in the properties of materials and a generous indication that real substances are normally nonideal. In many thermodynamics texts the departures from the ideal state are not impressed on the students' minds. Professor Weber has summarized conveniently several of the more well-known general equations of state. Also, graphic devices have been employed fully to indicate these nonideal conditions." Chem & Chem Eng N

"Those teachers who agree with Professor Weber as to the content of a course in thermodynamics for chemical engineers will probably be well satisfied with the book as it is. WEIDMAN, JEROME. Letter of credit. 442p $2.75 Simon & Schuster

910.4 Voyages around the world 40-34232

An account of an American novelist's trip around the world from New York to England, France, the Near East, the Far East, Australia and Hawaii, during the months from April to October, 1939.

"Mr. Weidman has a great literary gift in his ear for dialogue and delicate shading of spoken phrase which equals Ernest Hemingway's. He falls short of Hemingway's steady dignity because every now and then he gets carried away by his own flashy talent as a gag artist. He is at his magnificent best when he is hearing and seeing other people. Then he is firm and tender and kind. But when he or his own reactions must come into the picture, he takes frightened refuge in an annoying kind of Hollywood jabber, with all the grimaces and monkey antics of a Broadway hoofer. However, as I have indicated, there is less and less of this as the book proceeds." W. L. White

WELD, JOHN. Don't you cry for me. 494p $2.75 Scribner

40-7428

Story of a band of Americans who, in the winter of 1846-47, crossed the plains and the mountains and finally—the survivors among them—came to the promised land, California. The main characters are George Lansing and his young wife; Asa Harper; and Dan Johnson, captain of the train and the man whom Asa had sworn he would kill. In its historical aspects the novel is based on the story of the Donner party.

"The first 300 pages are crowded with infinite detail and little else. . . The last 200 pages stand out by contrast. . . The bitter struggle for existence became so intense as to be almost unbelievable. A reporter faithful to history, Mr. Weld uses an honest realism that will shock some readers. But he could not have trifled with the well known last part of the story without getting into trouble. Although his is a fictionalized version, he wrote it pretty much as it happened regardless of whom it might shock, and only the knowledge that it actually happened makes us credit the tale. The last part of the book will make good reading both for lovers of Americana and readers of horror stories." J. M. Breen

That is all to the good. . . "This may sound like old stuff, but it is not. Mr. Wells is not shrinking back to a mossy political liberalism; he is expressing the clear-eyed conclusions of one abreast with his own latest experience. He has seen it demonstrated all over Europe and Asia that however much the world wants order, it cannot get it by mere violence and the magic of symbols. . . There is for him no royal road to order. Knowledge and right will are indispensable. This does not mean that the world will heed, and educate its feelings and thoughts for the sake of self-preservation. But quite properly, Mr. Wells should not care. He has diagnosed the ailment and prescribed the sensible dose. The patient is always at liberty to pass out in self conceit or with the aid of quacks." "A man's ideas about a new and still invisible world-order can and should be checked by his ideas about the existing world-order which everyone can see. If he takes a sane and sober view of that his views about the future will command respect, whether they command agreement or not. Now what has Mr. Wells to say about things as they are? Again and again his views appear to me, I will not say perverse, for that simply raises questions of opinion, but divorced from fact. . . Mr. Wells is analytic, suggestive, as he always is, but not conspicuously constructive. Still he has supplied ample material for 'the great debate' and that is a service worth rendering." "The 'New World Order,' if it is read as a self-sufficient solution of the problems facing the world to-day, may seem jejune; its analysis of the world's disorders, though strikingly expressed, is not new, and the recommendations are so general and vague that, taken by themselves, they are of little practical use. But if we fill out its abstract propositions with notions from 'Tono Bungay,' 'William Clissold,' 'The Open Conspiracy' and 'The Work, Wealth and Happiness of Mankind' they acquire the content and the vitality with which the author in his own mind presumably endowed them. The difficulty about Mr. Wells from the practical reformer's point of view is his tendency to be too exciting. When he is prophesying world disaster he will not let it be anything less than world extinction. When he is asserting the inadequacy of modern rulers there is no fault or folly he does not attribute to them. When he is looking for a remedy it must be a revolution—a sudden operation—though his own remedies are such that they could only become efficacious after prolonged educative spade-work and the gradual moulding of character. Perhaps, since we cannot have it both ways, the happiest result of his book would be that the complacent should profit from his savage indignation, the extremists from his sweet reasonableness."

352 Local government 40-611

A survey of local government in the United States, both rural and urban, emphasizing economic and social aspects. The author is professor of political science at Bryn Mawr college. Contents: Local government today; The citizen and local government; Areas and structures; The states and local government; The role of the federal government. Index.

"Appraised from the point of view of its major thesis, the study, although brief, is both timely and useful. The presentation is scholarly, but neither dull nor heavy. . . Viewed as a textbook in the local field, the study is too comprehensive in scope for the brevity in treatment. Because of the nature of the subject-matter, wide variations in practice, and a persistent belief in the right of local self-government, broad generalizations and concise statements are unsatisfactory, if not actually dangerous." Buffalo still roamed the plains, the Hudson Bay company maintained its trade in furs, Red river carts made the long rumbling journey down to St. Paul, when the story opens back in the 1860's. The narrative is continued through the 80's and will interest any reader with a taste for the flavor of the old west." Wis Lib Bul

Occasionally the reader may suspect that the memory of the eighty-seven-year-old Irish-Indian from whom [Mrs] Weekes patiently drew this story is tall as well as long. Yet, in the face of the bold and tough and resourceful deeds which such men as he performed almost daily, who are we in this generation to be skeptical when Trader Welsh remembers skinning ten buffalo in the open during a forty-below blizzard? WERFEL, FRANZ V. Embezzled heaven; tr. by Moray Firth. 427p $2.50 Viking [8s 6d Hamilton, H]

(W) 40-11821

Teta, a Bohemian cook in an Austrian family, had adopted a nephew, and used all her savings to educate him for the priesthood, with the hope that he would be able to soften her journey thru purgatory. She never saw the object of her hope but once, and so it was thirty years before she realized that she had been aiding a crook. In her anguish the old woman made a pilgrimage to Rome to seek consolation, and her mission ended, she died.

"This is probably a finer novel than either Forty Days of Musa Dagh or Hearken Unto the Voice, and yet it is only the story of how Teta Linek, a domestic servant, tries to buy her way into heaven. . . In the portrait of her, the author has written what looks like a masterpiece."

"Though his conclusion is modified and tempered, one wonders, thinking of Teta, whether she is not rather an extraordinary personality than a significant symbol. Is a spiritual aim, no matter how unscrupulously pursued, better than none? Was not Teta's life on earth as selfish, mean, and crassly material as that of the grossest among us? Will a truly spiritual aim have no effect on the means? But having asked such questions and even having found no adequate answers in 'Embezzled Heaven,' Teta Linek still remains a searching study in human aspiration. The account of her strange journey to death is an engrossing narrative, the product of a richly stored intelligence sympathetically examining man's age-old fumblings for an ideal way out of it." "Contending from the start 'that all knowledge is grounded in first-hand experience and that there can be no knowledge which is not concerned with "objects" of first-person experience or with objects connected with this experience in definitely definable ways,' the author begins with the dawn of modern science and its method. Essentially, and by concrete examples, he answers in the rest of the book the question, 'How is the scientific knowledge of the world possible?' . . Chapter by chapter, the symbolism of languages, the fundamental ideas of mathematics, space and geometry, the new conceptions of matter, the problems of chemistry, and interpretations of life are discussed. There follow penetrating evaluations of the ideas of many concerning mind and personality, and free will and the laws of nature." (Scientific Bk Club R) Indexes.

On the afternoon in question the cousin has some callers, an Irishman and his wife who bring with them a falcon. He tells it with a polished hardness and indirection which heightens the effect of emotional conflict inherent in his situation. He could, had he wanted to, make a full-length novel out of the pattern—the material is there, actually and by implication. But he has chosen the more difficult medium of highlight and condensation. In order to facilitate such an understanding and such a comparison minute details of industrial and political organization have been minimized. . . Furthermore, the frequency with which dictators make substantial changes in organizational details makes their inclusion in a textbook of doubtful value. This is not to say that present institutions are not considered, for such is far from the case, but rather that chief emphasis has been placed on origins and background, on theory, problems, and prospects. By way of introduction it has been thought best to give a brief account of early proposals for economic and social reform, but for the most part the text deals with the contemporary scene." WESTON, CHRISTINE. Be thou the bride. 418p $2.50 Scribner
40-6344

Novel of interwoven lives and passions, covering a period of forty years, in the Maine town of Buckthorn. It is the story of the Whiplows and their cousins the Noakes, both belonging to old Maine families.

"Mrs. Weston has lived in Maine for many years and yet this novel about Maine has something in it of the literature of Europe. This is not strange, for Mrs. Weston is of immediate French and English stock. For this reason, perhaps, her characters are real but her background might be anywhere, a town in England or France as well as Maine. She is a mature observer of things unseen and unspoken and traces them with compassion and with honesty to the roots from which they spring." Rose Feld

"Miss Weston not only has narrative force and power, she has a remarkable ability to draw character. What she has not yet acquired is an artistic sense of proportion, that nice sense of balance and emphasis which selects and rejects. She seems to have overlooked the fact that a novel in which almost all the characters are mean, cruel, distorted mentally or physically can be as dull as one in which everyone is too, too charming, by the same token she has forgotten that while lechery may occupy as much time and thought in Maine as she says, that does not make it interesting or even intriguing."

"Though the novel lacks variety and contrast, it is on the whole well written. It has flashes of understanding, and some sufficiently deft phrasing. . . Some of the scenes have vividness and a certain degree of power, and though the general effect is one of a dreary monotony only slightly relieved by adultery, the book is not without promise." L. M. "All of this is presented in a style at once extraordinarily vivid and extraordinarily cold-blooded. One watches these figures go about their detestable affairs as one might watch an enormously magnified view of a female spider eating her mate—with fascination and with loathing, but without moral revulsion, simply because the creatures are so little human." "The novel is powerfully written and the characters, within their dark framework, are vital and consistent. The tragedy which marks all their lives seems inevitable, given the heredity and environment—whether or not these may be considered in any sense typical—which the author has created for them."

"Plumb full of Balzacian characters. . . In two generations their collective activities include a sex murder, several adulteries, a heap of frustrations and painful deaths, with only a gentle, all-forgiving girl named Fortune and leathery Grandmother Noakes to relieve the psychopathic shadows."

"This comprehensive work by the Professor of Silviculture in the University of Florida has to do with each of the eighteen timber producing regions of the United States—location and land ownership, physiographic features, climatic features, history, forests and their management, with the planting, conservation, cutting, and slash disposal of each type of tree. There are references at the chapter endings." (N Y New Tech Bks) The appendix contains lists of common names of trees and insects and their scientific equivalents. Index.

"This book may be regarded as one of the most informative works on some important branches of forestry which has appeared. For descriptive note see Annual for 1939.

"The book is written more for the general reader than for the specialist, and is only sparingly documented. Copious data illuminating the course of recent Mexican politics are made available; and the book will have one particular value in the field: no one who examines it can fail to realize the tremendous complexities of the problems which Cárdenas and other Mexican leaders have been trying to solve, and likewise why in many cases little progress seems to have been made." Donald Rowland

Am Pol Sci R 34:388 Ap '40 350w

"The meteoric career of Lázaro Cárdenas has been skillfully woven by the authors Weyl, into the fabric of the Mexican Revolution. The result is a description and interpretation of the man and his work which is one of the best I have read. The volume bears its own witness to the industry and scholarship which went into its preparation. It is a pity, therefore, that it is marred by an anticapitalistic imperialism bias which leads the authors to some thoroughly unacceptable assertions." J. L. Mecham

"The Harley Street specialist whose diary makes this book is an author and a broadcaster as well as a psychologist. At the outbreak of war he was put in charge of a special radio program of four talks a week by representative Britons and foreigners, 'In England Now.' His diary is thus that of a civilian worker rather than that of a physician—especially since there were very few patients anywhere in Harley Street, apparently, after war was declared. Yet he writes, of course, from the psychologist's point of view." N Y Times

"Through all the optimism of delusion which makes such tragic reading, a genuinely heartening note is struck, however, by of all things, humor. This is not because Anthony Weymouth is cracking jokes, of course, or looking for a cheerful smile: it is because of the Briton's odd habit, which this psychologist is so shrewd as to stress, of laughing at misfortune. It is perhaps the best note for us to remember."

"A great many of the criticisms contained in 'Battle Shield of the Republic' are penetrating and deserving of attention, but the author places too much faith in certain sure cures and panaceas. For example, one reform which he constantly advocates is the substitution of promotion by merit for promotion by seniority, the system which at present prevails in the army. The fact is brought out that Grant, a very able soldier, would never have arrived at the top had he been forced to depend on promotion by seniority. . . "The book is written in an interesting and instructive style. That the non-metallic materials are not treated more exhaustively, that quantitative information on corrosion is scant, and that economic considerations are not developed may well be attributed to the paucity of such information in the literature and the difficulty of presenting available data of this type in a condensed form which will not be misconstrued. "It is a long and carefully written novel, and doubtless authentic as a study of those troubled years. From it one gleans a considerable understanding of the political and religious antagonism involved, and of the family sorrows inflicted by exile and imprisonment. WHITE, PATRICK. Happy valley. 317p $2.50 Viking [8s 6d Harrap]
40-8825

A novel of small town life in Australia which relates the sordid love affairs, the jealousies and tragedies of a group of people—a doctor and his wife, a school teacher and his wife, the sophisticated daughter of a wealthy sheepman, a piano teacher, a family of Eurasians, and many others.

"There may be loose ends in the resolution of the conflicts Mr. White has set in motion, but there is also much wisdom. It seems to me that the novel somewhat dissipates its force by dispersion: both intellectually and dramatically, more would have been gained than lost by eliminating the character of Sidney

Furlow. But the flaws that can be laid to over-ambition are of little account in assessing so interesting a new writer as Mr. White. He commands a well-found style, freshly created to meet the needs of his material. . . And Mr. White displays a capacity to project scenes charged with remarkable vitality, atmosphere and power." J. We live in a world of complicated relationships and largely we have lost faith in immortality and have no sense of direction. In other words, many of us are lost. To Mr. White, the universe, here and beyond, is one and, although naturally conservative, his sincerity and intelligence compel him to offer this book, based on the divulgences of his late wife speaking from beyond, to a stricken world as a blazed trail to recapture faith in immortality, in the universe and in God and to better understand the nature of consciousness, spirit and life." For a time they wander together—settling briefly in a mountain lumber camp, then in Seattle, then journeying north in their own small boat. But finally in southern Alaska they find the bit of wilderness where they can build a home and resist the urge to further adventuring.

WHITTLESEY, DERWENT STAINTHORPE. The earth and the state. 618p maps $5 Holt
320.12 Boundaries. World politics. Geography 40-138

"A study of political geography." (Subtitle) "Although Professor Whittlesey appropriately takes as his central theme the relations between earth and state in Western and Central Europe, he includes within his survey the extension of the European system of government to the ends of the earth. Africa, 'a veritable laboratory of colonial experimentation,' is treated 'at unconventional length.' North and South America are considered on a scale commensurate with the discussion of Europe, and Australia-New Zealand receives adequate mention as part of the British Empire. Following the discussion of the states of the world, the book closes with two chapters dealing with law from the point of view of the political geographer." (Scientific Bk Club R) Glossary. Index.

Professor Whittlesey is an honest practitioner who restricts himself as far as he can, to the legitimate geopolitics. That is to say, he uses the formulas of geopolitics as a method, a technique, for assessing in political terms the balance between societies and their geographical environments. . . "One has an unusual sense that this book is written out of an honest liking and respect for human beings, for their foibles and foolishness as well as for their yearnings; this liking, it must quickly be added, is based on keen and sensitive discrimination, not on the fatuous fondness of a Pollyanna. The choice of a high school boy as the central figure of the story opens the field for observation, through his eyes, of the whole gamut of experience which adults often come to take for granted. There is much unpretentious wisdom in the book, and with it a warmth and charm which will make it remembered, like Mr. Wickenden's earlier novel, for one's pleasure in reading it." Mary Ross

In 'Inquest' we have an instance of the better-class red-herring school so well done that even the experienced reader is encouraged to shift his suspicions from one character to another, and only the very strong-willed will observe the indications which are there to give him an idea from an early point in the story who the villain is. . . The coroner permits long-winded statements, elaborate documents to be read in evidence and an autocratic court exhibition by the authoress. But he is not such a grasping fool as he is at first made to appear (this is perhaps a too unexpected transformation), and in the end he unravels the truth—as the reader should. WILDER, ROBERT. God has a long face. 461p $2.50 Putnam

40-33790

"General" Basil Wallis Burgoyne deserted the army four days after Appomattox and took five years to work his way back to his home in Cincinnati. He was six and a half feet tall, and broad and loud spoken besides, so his more refined brothers were glad to pay him a lump sum and get rid of him. The story is of his trip south, his marriage, his establishment of a home and a family in Florida, where his roistering and swashbuckling made him a legendary figure even in his own lifetime.

"The early development of Florida's east coast, the investment of Northern capital and the advent of Northern tourists, the post-war boom and the synthetic excitement of Prohibition Scotch: all this material is well handled, and around the career of the family Burgoyne, with its giant, savage, kind-souled men and its appreciative, admiring women, Mr. Wilder has written a consistently interesting story." Lawrence Olson

+ **Books** p10 N 3 '40 650w

"With a little more restraint, Mr. Wilder might have made 'God Has a Long Face' a memorable saga of the Florida frontier. As it is, he makes it one of the most rousingly readable novels of the year. You will go far before you'll find such gargantuan eating and drinking. The general—and Mr. Wilder—do big things in a big way." Lewis Gannett

+ **Boston Transcript** p11 N 13 '40 600w

"Fantastic as this saga of the Burgoynes may sound in fiction, it parallels a development no less fantastic in fact. Robert Wilder sticks pretty closely to history. . . The reader who began by marveling at the General, and only half believing in him, will be surprised to find before the story is done that he has developed an honest regard for the tough, blustering, kind-hearted, disappointed old rascal." Margaret Wallace

+ **N Y Times** p6 N 17 '40 700w

"'God Has a Long Face' is far from being a restrained or polite work of fiction. In so far as it tells the story of a collection of shacks becoming a city, it is a distinctly American saga. The personal narrative is less effective as it unfolds its diverse incidents and a great expanse of years, but the reader feels an interest in the untutored, undisciplined man attempting to found a family of whom he can be proud, but fated from the first to fail."

WILHELM, GALE. Bring home the bride. 180p $2 Morrow

40-12364

This brief novel relates the love story of a sophisticated, cultivated girl, with a reckless, unconventional past, and a man, younger both in years and experience. They meet by accident while Carol is vacationing at a mountain resort near Hans' home, marry, have a few weeks of happiness, and then are separated by tragedy.

"In style a bit on the precious side, with occasional deliberate and self-conscious repetitions like the recurrence of an identical phrase in music, Miss Wilhelm has nevertheless a thrifty magic with words that is sometimes breath-taking. And her characteristic habit of juxtaposing the common or crude aspects of reality alongside the more fragile, evanescent romantic values has a piquancy that is essentially modern. For its blending of nature and human nature in one harmoniously beautiful whole, for its study of the maternity in sex, 'Bring Home the Bride' is outstanding. It is beautiful and complete." F. H. If the editor was wise in his choice, the author also was fortunate in his task, for this appears to be one of the most manageable periods in English history for the writer of such a book. In consequence this book presents no difficulties or discomforts of arrangement, except that from which nearly every volume that has yet appeared in this series has suffered in some degree: namely, that it seems to be very difficult for a political historian to furnish the brief cross-sections of literature and the arts which are exacted from him with much more than lists of names, which do little to enlighten the reader. "Passages from Old English literature from the sixth to the eleventh centuries." (Subtitle) "This book . . . is not a history of Old English literature, nor a criticism of it, nor even an exposition of that distant culture. It is an attempt to let Old English literature speak for itself. To this end the translations are as literal as possible, unclothed in modern metres and forms of speech. . . The development of Anglo-Saxon life and thought, and the Scandinavian, Celtic and Roman influences that helped in that development, are told as a consecutive story, into which the poems and prose passages are woven, each in its place." (Foreword) Chronological tables. Select bibliography. Index.

WILLIAMS, OSCAR. The man coming toward you; a book of poems. 109p $2 Oxford

811 40-7564

"One day in 1936 a smart, middle-aged successful advertising-man, who had turned his hand to conducting publicity campaigns for Florida politicos, set out to drive the 212-mile stretch between Jacksonville and Tampa. He reached Tampa alive but different: on the way he had had a dazzling vision of life as it could be, had said good-by to the beliefs which until then had stimulated his business career. . . One day he wrote some verses about the English coronation—which he immediately sent to every paper in the U. S. and the British Empire. From that day since, Oscar Williams has been no advertising-man but a professional poet." Time

"Mr. Williams will not make a simple statement if the nth degree of hyperbole can be worked in. He thinks in stupendous immensities and multitudes, and everything that does not drip, vomit or roar, explodes. There is an explosion of some sort on almost every page. . . Certain stanzas in 'Little Steamboat,' 'Song for December 24th,' and 'Lazarus' bear witness that, when he pares down the verbiage and puts his work on a normal footing, Mr. Williams can write a good poem." "The primary objection which is likely to be raised by Mr. Williams' more thoughtful reader is the old one of content. There is a curious aridity to these poems that mounts as one reads. That, and the familiar theme of the group which he resembles, do not tend to enhance the intellectual enjoyment of his poetry. Yet, despite this, Mr. Williams' book should be read, if only for the freshness of imagery and the subtle pleasure of several poems like 'The Elements.'" John Ritchey

What Mrs. Williams has done, in addition to preserving Cap'n Bob in printer's ink, cause for gratitude in itself, is to produce a lively, valuable and entertaining picture of a Virginia family, done both lovingly and knowingly. 40-35170

In this sequel to White Mule (Book Review Digest, 1937) Dr Williams carries on the story of Joe and Gurlie Stecher and their two small daughters, Lottie and Flossie.

"Dr. Williams is a practicing physician, a pediatrician. More than anything else, it is his keenly penetrating study of two very young children in relation to their parents that distinguished the novel 'White Mule' and its sequel, 'In the Money.' It is to be hoped that the growth of the children will be followed up in further novels centering about the same family." Ruth Lechlitner

"The story's faults may be the familiar ones. The tension occasionally weakens: from chapter five to chapter thirteen the continuity approaches the loose one of a chronicle. The frequency with which the dramatic method of the bare dialogue is exploited also fatigues at times. There still is a superfluity of medical moralizing. However, these faults are less obtrusive here than heretofore. By and large, the well-varied scenes are cumulatively built up, fully conveying the author's meanings." Paul Rosenfeld

+ — **Nation** 151:507 N 23 '40 850w

"Williams seems to be engaged not in turning up any new experience but in rehabilitating, on principle, the commonplace. And reliving the commonplace with Williams is a simple experience of the senses and sentiments, involving no challenge to our intellectual patterns. One may not agree that his literary program is quite the Great Mission that his most fanatic admirers represent it to be. But he does bring to his writing many fine gifts." F. W. Dupee

"In these novels poet and pediatrist fuse to make the story teller; for the prose is crystalline and the children are people. One may object to the first for its cool objectivism (not the reviewer, who found joyous relief from weakly emotional prose muddied by tears), and to the second for the physician's unscientific partiality for little girls (not the reviewer, who shares it). But none of literary maturity, surely, but would admire the novels in their parts, details and minutiae, however cold they left him." F. T. Marsh

"The first part of the book gives a brief discussion of the role of pupil-personnel work in education, indicates the specialists and the generalists who take part in the program, and defines the functions of the 'clinical counselor.' The procedures used by counselors are then outlined, and analytical techniques, the art of diagnosis, and the techniques of counseling are considered in some detail. A discussion of the counselor's psychological background concludes this part. The major portion of the book is devoted to a rather full consideration of the techniques used by counselors in diagnosing and counseling in specific situations. A concluding chapter suggests needed investigations in the field." (School R) Index.

One gathers that the author's purpose is honestly stated in the subtitle—not an argument for or against any form of social organization, but a study of the forces that make history what it is and of the ways in which some men have interpreted those forces and others have tried both to interpret and to use them. But it cannot be concealed that there emerges from the story of communism a stern verdict upon those who, beginning with slogans of liberation, have ended by constructing new instruments for enslavement." It professes to be an analysis of interpretations of the meaning of history, beginning with the Renaissance philosopher Vico's rediscovery of the unity of history and with Michelet's discovery of Vico's historical principles. The first part of the volume leads one to assume and to hope that the issues raised by the Renaissance and the Enlightenment will be fully analyzed. . . But nothing of this kind is forthcoming. Once embarked upon Marxism Mr. Wilson gives us a series of very penetrating character studies of Marx, Engels, Lenin, and Trotsky. His chapters are often rich in trenchant observation. There are many pages of shining prose. But as a whole, I fear, the work is ponderous and even sluggish. For once Mr. Wilson is erudite and solid rather than erudite and brilliant, and I am a little puzzled to know why this should be so. "Attempts the difficult job of rooting Plato's thought in the political and economic ground of ancient Greece. [The author] does not take the emergence of Platonic philosophy as a miracle. Viewing his subject from this sociological standpoint, he is able to discern fresh and interesting relationships between Greek thought and life." (Boston Transcript) Index.

"While his approach is fruitful, Mr. Winspear has some of the defects of the pioneer. His equation of a philosopher's concrete social status with his specific metaphysical beliefs is sometimes accomplished by main force. Also his own political and economic conceptions are somewhat rough and ready. . . But it is clear that the tools employed need refinement and precision if he is to finish the difficult job tackled. . . On the other hand, the lengthy analysis of Plato's 'Republic' is both suggestive and illuminating. And 'The Genesis of Plato's Thought' may be regarded as an important first step toward making Plato's relations to his contemporaries intelligible." Albert Wohlstetter

"This book will probably get a lot of panning in the scholarly journals. From various sidelong observations in his text, I conclude that the author expects this and puts it down to the unconscious social bias of his academic reviewers. . . I agree with Mr. Winspear that he is extremely liable to be ill treated by his academic reviewers, and for the most part unfairly treated. It seems to me questionable whether the ill treatment would proceed as directly as he indicates from class bias, but it certainly is related to another derived phenomenon—the dislike of the average college teacher for complicating the pleasantly abstract intellectual proposition by considerations of life as it has ever existed in this world. . . Frequently Mr. Winspear's evidence amounts to proof only when his basic hypotheses are accepted on faith and applied mechanically." David Grene

"The narrative is entirely frank, but the reticence of language is such that it will not offend sensitive minds. The account of the three trials is brilliant and moving, for the narrator has a fine sense of the dramatic quality of this distressing episode. It is fuller, with more direct quotation from the testimony, than that given in the recent biography of Lord Carson. There is a moving sympathy in Miss Winwar's story of Wilde's life in prison and of his last forlorn, degraded years on the Continent of Europe." S. C. C.

"Tracing Wilde's disordered personality to Speranza, who is probably the oddest and most odious mother in literary chronicles, relating his work to the aesthetic movements of his time, viewing his final tragedy against the

Victorian moral dogmas, Miss Winwar has performed a valuable service. Her Wilde emerges as a social being rather than an esoteric excrescence. The incredible Oscar becomes credible." Maxwell Geismar

In the first place, she is frank; and in the second place, she keeps steadfastly to her purpose of drawing a consistent figure. This, we must believe, is the Wilde that really existed. Neither moral scruples nor personal prejudice seems to have diverted her from the logical deductions to be drawn from her documentation. And the result comes very close to Frank Harris's statement." WISSLER, CLARK. Indians of the United States; four centuries of their history and culture. (Am. museum of natural hist. Science ser) 319p il $3.75 Doubleday
970.1 Indians of North America
(W) 40-27194

The curator of anthropology in the American Museum of Natural History deals with the Indian during the frontier period of United States history. The book is in three parts: a sketch of prehistoric Indian life in America; a detailed account of the great Indian families and their subdivisions; a description of Indian life today and of the contribution of the Indians to our culture. Index.

"Probably the public at which this book has been aimed will find the last section of the volume the most interesting. The chapters describing white men who 'went Indian,' and the effects on the Mongoloids of 'three strange gifts from the white man'—the gun, the horse, and liquor—will make interesting reading for those numerous modern Americans who seem incapable of attention to historic events which do not concern their own immediate ancestors. . . Dr. Wissler, one may hope, will yet revise and reorganize his unique American Indian so that while remaining invaluable for specialists it will be more easy of absorption by college undergraduates and other beginners." Gregory Mason

"The book before us stands out among several recent general treatments of the Indians of this hemisphere. . . Wissler has no axe to grind. He stands at the peak of a long career of study and field work among the Plains Indians and of writing, teaching, and museum administration with the object of making his fellow man more familiar with the Indians of history. Wissler has proved that a scientist can write interestingly of the Indians of the frontier. . . I commend this work to general readers and students who feel the need of an introductory book on the Indian peoples of our country, and even mature scholars can benefit from Wissler's breadth of perspective." WOLFE, THOMAS. You can't go home again. 743p $3 Harper
(W) 40-27633

This sequel to The Web and the Rock (Book Review Digest, 1939) continues the story of George Webber from the late nineteen twenties to the middle thirties. The book is divided into several sections, dealing respectively with Webber's experiences as a home-town visiting author, a traveler in England, and a sojourner in Germany during the early Nazi years there.

"The weaknesses of 'You Can't Go Home Again,' as of all Wolfe's books, are, so to speak, functions of its virtues. On the one hand its power and on the other its excesses both stem from his unexampled exuberance, his floodlike richness, his epic intentions. In all this he is in the tradition of 'Leaves of Grass' and 'Moby Dick'; his books, like these, reflect an expansiveness, an extravagance, an emotional giantism which has been called American. And, as in those earlier works, when passages in his books fail, they are above all inflated, rhetorical and intolerably redundant." Milton Rugoff

WOLFE, THOMAS—*Continued*

"My feeling about any novel by Thomas Wolfe is that even if it were not good I'd like it. I'd like it for its ebullient, electric vitality, its obvious sincerity, the glowing, almost incandescent poetry of its style, the sense which it gives, however confusedly, of a meaning, a unified current, recognized in the seemingly helter-skelter maze of human life. These qualities light up 'You Can't Go Home Again' for me, just as they illuminated 'Look Homeward, Angel,' 'Of Time and the River,' 'The Web and the Rock,' and many shorter pieces; but there is no denying that Wolfe's methods, his themes, and to a large extent his material remained the same throughout his work, with the result that his inspiration suffered a gradual diminution of intensity." "The novel gives me, at least, every reason to believe that had Thomas Wolfe lived he would have become the greatest of all American novelists. There are things in his other books almost as fine as anything in this one, but 'You Can't Go Home Again' will stand apart from everything else that he wrote, because this is the book of a man who had come to terms with himself, who was on the way to mastery of his art, who had something profoundly important to say. His death was the greatest loss to American letters in our time." J. D. Adams

+ **N Y Times** p1 S 22 '40 1050w

"For me, this book is not as fine as 'Look Homeward, Angel' or 'Of Time and the River.' It has a note of querulousness in it, self-defensive, almost rude at times. It is even fuller of ego than the preceding volumes, and it lacks the morning freshness of 'Look Homeward, Angel.' It is at its best when the hero himself is out of sight, when some odd grotesque, like the little Japanese gentleman of Book I, or some overpowering personality, like Lloyd McHarg, usurps the stage and Wolfe temporarily forgets himself. Wolfe had wonderful talents, but no mastery either over himself or his materials. It would be gracious and pleasant to be able to say that in his last labor he was beginning to achieve this mastery, but it would, I fear, be untrue." Clifton Fadiman

+ — **New Yorker** 16:78 S 21 '40 1050w

"Though there are extraneous chapters—though 'You Can't Go Home Again' contains some of Wolfe's worst writing as well as much of his best—there is a clear, though winding path through the great forest of words and incidents and memories. There is a line, and a mature line. George Webber does grow up, not merely by fiat. There are such brilliant single incidents as that of Mr. Katamoto and that of the fantastic, believable meeting with Lloyd McHarg. But, more than that, though many things on the way were vanity, George Webber's pilgrimage was not vanity, and we do not feel that it was. The book ends neither in doubt nor in disillusion." S. V. 113 Philosophy of nature 40-36191

"Professor Woodbridge here attempts by common-sense methods to resolve the dualism inherent in the scientific view of the universe. He defines Nature—which he always capitalizes—as the sum of everything which makes up the setting of human history. Whatever is, he would say, is natural—including a belief in the supernatural. Sir Thomas Browne, Santayana, Plato, Goethe, the Te Deum contribute to a point of view which may be justly described as the fruit of wisdom." (Nation) Index.

"There is much in this book that is directly contrary to both the Catholic and Protestant viewpoint. It is probably true that some of this material will be overlooked by many readers because of their not making the natural inferences from Professor Woodbridge's arguments. . . "To properly evaluate these polemical, experimental, expositional, and popular articles would take a deal of research. There are innumerable hints, suggestions, and ideas that still await discussion and experiment. It is easy to see, however, that the author has from first to last been in the current of psychological development in the United States and he has himself contributed not a little to it. Indeed, it is remarkable how frequently the positive contributions of these papers have been incorporated in present day psychology." H. P. Weld

WOOLF, LEONARD SIDNEY. After the deluge: a study of communal psychology; v 2, 1830 and 1832. 317p $3.50 Harcourt [15s Hogarth]

301 Democracy. Social psychology (32-3678)

Volume one of this work (Book Review Digest, 1932) dealt with the origins of the communal psychology of democracy, its general nature and its relation to the French revolution of 1789. The present volume examines the first attempts of the nineteenth century in France and Britain to translate the ideas and principles of democracy into practice, thru the Reform act of 1832 and the revolution of 1830 in France. Indexes.

"Mr. Woolf's book is full of illuminating remarks and shows an excellent and thoughtful acquaintance with the movements of the period discussed; but it seems doubtful how far the general scheme adopted does justice to the realities of history and to the necessarily slow, painful, and strenous development not only of democratic institutions but above all of democratic mentality, not only with the classes but in the first place with the masses." The phrase 'communal psychology' has a scientific sound, but the evidence for such psychology is not drawn from a detailed analysis of emotions and ideas or even of physical reactions. It is confined to what earlier writers would have called 'the organs of public opinion.' The book, however, is well writ-

Some of Mrs. Woolf's readers, accustomed to the very personal quality of her imaginative writing, will perhaps be surprised at the cool and level stretch of this narrative; and if they have found her critical essays sometimes too oblique and coy, they will be pleased with a new firmness and directness." 821 40-35120

Passages selected from the journals of Dorothy Wordsworth and printed as imagist poems.

"The 'poems' which Mr. Eigerman presents were prose so far as she was concerned—luminous and sometimes unconsciously rhythmic bits of prose selected from her journals. Now printed in the form of free verse, their poetic quality is disclosed. It is authentic and distinguished. The process of finding poetry in prose may be carried to extremes. This, for example, is printed as a complete poem:

I saw a robin
Chasing a scarlet butterfly.

If poetry requires no more than that, most of us have written more poetry than we get credit for. But the vast majority of the poems here revealed invite no such questioning."

Every word is aimed squarely at the object and every figure is inseparable from the image. The rustic life seldom becomes sentimental in her hands, because she never makes judgments. She is forever the observer, economical and precise. But this precision is not always poetry, or even imaginative prose. Mr. Eigerman is more than a little deluded by his enthusiasm." "The scope and purpose of this edition of the World Book Encyclopedia follows the standards and traditions of its many predecessors since 1917. This encyclopedia was last reviewed in the Subscription Books Bulletin in January 1935 [Book Review Digest, 1935]. . . Many improvements were noted in the 1939 edition, which resembles that of 1934 in format and in range of subject matter. Revision consists of articles rewritten, as China, Corn, Dairying; articles largely revised, as Hitler; or articles revised in part, as Houston; and the addition of some new subjects, as Petroleum, Water, Family, Public opinion, and, under Government, a comparison of Democracy, Communism and Fascism. Changes and corrections have been made to complete or to correct dates and statistics, as in the article on Masaryk. Additional space in this edition is obtained by inserting pages with supplementary numbers, e.g., p.2882a." Subscription Bks Bul

"In the rewritten articles there is a commendable trend toward the use of specific rather than general information, see Asphalt. An impartial noncritical attitude has been adopted. . . There is evidence of hasty revision and inconsistence in certain sections. For instance, the sketch of the new pope, Pius XII, has been added, and the death date supplied for Pius XI, under the entry Pius, p.5639, but in the list of popes, p.5735, Pius XII is not included. . . The set is recommended for home, school and public library use; the 1939 edition is recommended for libraries needing replacements or having editions earlier than that of 1934. Editions issued between 1934-38 are still satisfactory for general use."

Part 1 is devoted to the population situations and claims of the so-called 'dissatisfied' countries (chiefly Italy, Japan, Poland, and Germany); part 2, to notions of over-population and to present population trends and their various effects; part 3, to solutions for the problems indicated. An appendix on the organization of migration, a source bibliography, an index, and a study of the population capacity of Australia are appended." Am Econ R

975.5 Virginia—Social life and customs—Colonial period. Virginia—Intellectual life. Virginia—Biography 40-8029

"The essential thesis of [this] essay is that the Virginia aristocracy was not less a real aristocracy because it was self-made. That it developed a pattern of its own—with the seventeenth century English squire and man of the world as model—that it held firmly to that century's ideal of a liberal education. . . Mr. Wright gives us from the contemporary records pictures of several of the most notable—William Fitzhugh . . . Ralph Wormeley of Rosegill, Richard Lee of Westmorland, Robert Carter of Corotoman . . . Byrd, himself, a goldsmith's grandson, and Robert Beverley (Byrd's brother-in-law)." N Y Times

"Dr. Wright's book presents the early gentlemen of Virginia as men of character and substance. In that he does not exaggerate, although one could wish that he had not painted them as quite such unblemished statesmen and patriots. It would also have been interesting if he had examined the intellectual concerns of some early Virginia leader who sided with Nathaniel Bacon. . . At all events, Dr. Wright has afforded us a significant view of half a dozen types of the early Virginia gentleman, and has oriented that worthy ably in the Colonial milieu. Moreover he writes with a lightness and freshness of touch which some historians are not able to command." Virginius Dabney

Perhaps it is a little over-weighted with detailed descriptions of Virginia libraries. A handsome explorer recently returned from an expedition to Peru, minus his fortune and with his face badly scarred, is stricken with a tropical fever. While he is being nursed back to health he discovers one woman who does not shudder at his marred face, and to whom money means very little.

"You will find it interesting as a psychological study, enlivened by flashbacks of Mart's adventures in Peru." Lisle Bell

WRIGHT, RICHARD. Native son [introd. by Dorothy Canfield Fisher]. 359p $2.50 Harper

Story of a Negro boy's crimes, of what part society played in those crimes, and of how the boy paid the penalty.

Booklist 36:307 Ap 1 '40

"The faults of the book should be recognized; it is more than once guilty of melodrama, adding artificial excitement to a sufficiency of the natural kind; it heaps up complications beyond the reader's powers of assimilation; occasionally the plot skates on thin ice; and several times Bigger's confusion seems to baffle even his creator—but in the end these all seem easy to overlook, negligible imperfections on the surface of an extraordinary story movingly told. If the tests of a memorable novel are that it engage the reader completely, move him profoundly and constitute a revelatory intellectual experience, then 'Native Son' will not soon be forgotten." Milton Rugoff

+ **Books** p5 Mr 3 '40 1000w

"The novel seems to me imperfect and uneven. If it were all like its opening scenes, it would be a moving study of Negro life. If it were simply melodrama, it would, being shortened, have great emotional punch. If it were all like its last quarter, it would be dull propaganda. As it is, one is sympathetic with Bigger, then one shudders at him, and, lastly, one is glad when he is dead just as one is glad when the villains in Victor Hugo are dead. At times Mr. Wright shows a Dostoievsky-like insight; at other times he writes like a tent-and-thirt melodrama." H. M. Jones

"Even compared with Dreiser this volume is strong meat. From the moment a giant black rat steals into the Thomas family's one-room flat, on the opening pages, till Bigger in his death cell bids his attorney farewell on page 359, 'Native Son' is a 'shocker.' It is brutal, frank, sordid. It is no book for adolescents or for squeamish adults. But this brutality is skillfully subordinated to a wider purpose." Edward Skillin, Jr.

"Mr. Wright's style often reminds on of a stream 'riled' by a heavy storm. Its element of Biblical rhetoric is not out of place since it is part of the colloquial heritage of the Negro in America, but there is in addition a bookish quality, often encountered in the self-educated writer, which should be weeded out. Mr. Wright's boldness in choosing to develop his theme through the story of a 'bad nigger' is all to the good, but his flair for the melodramatic could bear curbing." Margaret Marshall

The poisonous guff of Behaviourism has already been so completely forgotten in England that one has a shock of surprise at finding that twaddle still cropping up other than as an element in farce or satire. . . The astounding thing is that the publisher is able to send out with the book a typescript, about the weight of a small Tor Bay Sole, entirely made up of favourable reviews from the American Press. Over here and away from that particular racial problem the book seems unimpressive and silly, not even as much fun as a thriller." Anthony West

"Mr. Wright does spoil his story at the end by insisting on Bigger's fate as representative of the whole Negro race and making Bigger himself say so. But this is a minor fault in a good cause. The story is a strong and powerful one and it alone will force the Negro issue into our attention. Certainly 'Native Son' declares Richard Wright's importance, not merely as the best Negro writer, but as an American author as distinctive as any of those now writing." P. M. Jack

"'Native Son' does for the Negro what Theodore Dreiser in 'An American Tragedy' did a decade and a half ago for the bewildered, inarticulate American white. The two books are similar in theme, in technique, in their almost paralyzing effect on the reader, and in the large, brooding humanity, quite remote from special pleading, that informs them both. . . Dreiser's book is greater, more monumental, more controlled, more knowledgeable, but 'Native Son' is apt to have much the same effect on any reader who is not afraid to go through its dark and bloody pages. I say 'afraid' advisedly, for this is strong meat. It is not merely a book but a deep experience." Clifton Fadiman

"As a Southerner I may be suspect, but I think this book is better as a headlong, hard-boiled narrative than as any preaching about race relations in America, North or South. Certainly no sensible Southerner will deny the authenticity of Mr. Wright's picture of the plight of his race. But not only Negro boys in pool rooms and slums in Chicago feel caught and find a distorted manhood in violence. The rules of an insensitive world may be more binding, more hope-denying among them. But every order creates its rats and rebels and every civilization—so far in existence—deserves them." Jonathan Daniels

WYLIE, IDA ALENA ROSS. My life with George; an unconventional autobiography. 351p il $3 Random house

B or 92 Authors—Correspondence, reminiscences, etc. (W) 40-27773

The George of the title refers to the author's unconscious. Her autobiography begins with an outspoken character sketch of her English barrister father, whom she hated, and describes her youth in London, her adolescent years in Germany, and her more recent residence in both England and the United States.

"From her years in Germany, England, and America, Miss Wylie has written a story heads above any of her fiction."

"It is very interesting to follow I. A. R. Wylie through her individual life and her novelist's career. But although the latter part of her book deals with less unusual material, the entire autobiography is really vital commentary. A profound digression on pacifism, a gay handwave toward stage mannerisms, a memorable word about those 'good-humored, beery, indomitable people who are London's Permanent Elizabethans'—in all this, as in the portrait of Alec and the reflective memories of Germany, are the book's penetrating distinction and lasting charm." These stories of deep sea fishing off Miami relate the adventures of two young fishermen who rehabilitate an old wreck and charter her out to visiting sportsmen.

"Crunch and Des are extremely likable characters, and their one-track minds—forever fixed intently on fishing or fishing equipment—are not much of an exaggeration. Readers who have tried fishing off Miami or the Jersey coast will probably protest that Mr. Wylie's anglers pull in an unusually large catch on almost every trip, but the author explains that he has picked the good days—for the sake of good reading. As for the leading characters' preoccupation with fishing talk, we can personally attest to its existence in fact." Fred Feldkamp

It seems to me that there is nothing here that can compare with the work of the earlier Yeats. . . What does remain in these poems is the technique, and that is not to be challenged; but, after all, so much was to be expected of a poet who has been hailed, and rightly I think, as the greatest of this century, who has even been set above Shelley and Keats, and who was certainly the greatest poet that Ireland has produced." They are the last testament of an extraordinary personality, of a vehement, lonely, passionate man, one who never forgot a friend or forgave an enemy. . . He whose ideal was the court life now sees himself as a ragged beggar or an old vagabond walking the hills. "There are, particularly in this volume, more frequent echoes from his own previous work, both in phrasing and rhythm, than there ought to be, and though every short poem, no doubt, expresses an attitude which in so far as it is one out of many possible moods may be called a pose, its singularity should not obtrude, and on occasion Yeats indulges in an embarrassing insistence upon an old man's virility, which some one who was more self-critical, not as a poet, but as a man, would have avoided. . . Yet how little we care. For it is the lyrics we read. In lyric writing what matters more than anything else, more than subject-matter or wisdom, is diction, and of diction, 'simple, sensuous and passionate,' Yeats is a consummate master." W. H. Auden

974.7 American loyalists. New York (state)—History—Revolution. U.S.—History—Revolution 39-31743

This work, based upon research into manuscript sources on colonial and Revolutionary New York, tends to disprove the idea that the large loyalist estates confiscated after the Revolution led to a growth of land ownership among the lower classes. It is the author's thesis that in the counties of New York, Kings, Queens, Suffolk, Richmond and Westchester, the lands "fell to wealthy and influential merchants, landowners, army contractors, Revolutionary leaders and speculators, many already possessed of substantial land holdings." Bibliographical note. Index.

"The present volume is a scholarly examination of the time-honored thesis that land tenure in southern New York was sharply democratized by the sale of loyalist estates during and after the American Revolution. "Some of the personal history, especially of the author's childhood, is interesting if somewhat lusty. His satisfaction in the precise number of pheasants, grouse, duck, bear, deer, and other animals that he has killed when he was not busy operating upon human beings may please some readers; it will certainly offend many others. The author is recognized by the medical profession as a distinguished and accomplished surgeon. It is a great pity that he felt impelled to write a popular account of his achievements for an audience unprepared to evaluate them scientifically but more than capable of detecting the literary and personal weaknesses revealed in their narration." 137 Personality. Adaptability (psychology). Social psychology 40-33055

"This book is designed primarily as a text in courses dealing with the psychology of personality and with mental hygiene problems, but it should be of interest to many who are not professionally concerned. Part one is a summary of the physiological and social foundations of personality while part two is concerned with various problems of personal adjustment. Part three is concerned with certain wider implications, the possibility of integration through religion and art as well as the interrelationships of personality and culture." (J Philos) Bibliography. Index.

"Much of the value of the book lies in its clear and explicit formulation of a naturalistic theory of the origin of the self. . . The two chapters [of part three] are decidedly the least satisfactory part of the book. The treatment is too brief, and the method of extensive quotation from a large number of authors gives the impression of a confused mosaic rather than of any clear solutions. The chapters are not needed, for surely one volume does not need to take up all the possible implications, philosophical as well as psychological. Philosophers will be glad of the chance to draw some of the conclusions for themselves, and there is ample material in the book to justify their attempt to do so." Laurence Sears

Andrew Benton, the hero, is seven years old at the time of Braddock's defeat in 1755; he is eighty-seven when the story closes. During those eighty years he has taken part in most of the great border events—he is captured by the Shawnees in his youth and marries one of them; he is with George Rogers Clark in the capture of Kaskaskia, and at the storming of Vincennes; he fights with Anthony Wayne at Fallen Timbers; marches with Harrison to Tippecanoe; and survives the Fort Dearborn massacre.

"If Mr. Zara's novel has any fault it is its length which seems to be due chiefly to the author's feeling that he must begin his story when he does. Many readers will feel that he might have written the same book in all essentials if he had begun twenty years later to follow the Westward sweep. Nevertheless, this is a fine and well wrought novel, proceeding out of a sincere and intelligently directed desire to show the first years of this country's Westward thrust." J. H. Jackson

Not all the book is at this high level: some of the purely imaginary characters are not so interestingly seen, and the invented incidents of their lives at times make pedestrian reading. There is much commonplace writing in the first two hundred pages. . . 341 International law and relations. Marshall, John 39-33112

"All of the material relating to Marshall and international law is here brought together. . . The work points out that Marshall's preëminence as a man and as a jurist is not essentially limited to his constitutional pronouncements. It is, however, not a biography of Marshall, but rather a study of one aspect of his career which has been too much neglected by all who have written about him before." (Publisher's note) List of authorities; table of cases; index.

"If any justification were needed for a book on John Marshall's contribution to international law, the present volume would amply supply it. The author has performed his task thoroughly and with discrimination." J. B. Moore

"These decisions constitute a contribution of almost as much importance in their field as Marshall's decisions in constitutional law. . . The tone of the book is in the main highly laudatory, and perhaps pardonably so in the face of the record. Exception might well be taken to the author's interpretation of the present status of international law: 'In Marshall's day there existed a real *jus gentium*, a common law of all civilized nations. Today most nations of the world deem themselves entirely too civilized to be bound by any such absurd and ludicrous conception.' International law today controls the relations of states quite as well as it did in the time of Napoleon with which Marshall was familiar." H. J. Tobin

Am Pol Sci R 34:370 Ap '40 550w

"Neither the Marshall nor the law of nations presented in the book is new or is claimed to be new; what is new is the setting in which Marshall, as we know him from other writings, examines, expounds, applies, and expands the international law of the time as he knew and we know it from many works. But that aspect in itself should suffice to assure for the book a permanent place among the Marshalliana as well as in the basic literature on the history of the attempts to establish what we call international law." "Followers of the historical approach to an understanding of the American city will be disappointed, if not shocked, by the absence of any treatment of the development of American municipal institutions. On the other hand, those students who think of the city in terms of the human beings who live in our cities today will consider that the author has done a particularly effective piece of writing, based on his recognized familiarity with the field, as demonstrated by his treatment of political bosses, the political machine, municipal pressure politics, and the city voter. To those who look upon the city largely in terms of its position as a municipal corporation, the chapters on legal characteristics will appear inadequate and superficial. "All who read Dr. Zinsser's 'Rats, Lice and History' will want to read this second book by the same author. They will find in it the same civilized humor, the same occasional harmless irreverences, the same broad-gauged philosophy (too profound and confident for hysteria), the same doubts that are not cynical and beliefs that are not dogmatic. They will also find it a little more serious in its underlying tone. A biography, carried through to the exit curtain, must necessarily have some seriousness. But this one does not become solemn at any time. It makes both life and death appear a part of the order of an orderly Nature." R. L. Duffus

+ **N Y Times** p1 Je 30 '40 1700w

"Though always readable and often valuable, [the book] is not entirely successful. It falls between two stools, being neither sufficiently discursive to create a living picture of a personality nor sufficiently well organized and thoughtful to achieve the significance of a book like that of Henry Adams. One feels that there was more to R. S. than appears in these pages—more altitude, more temperament, more meaning. . . 'As I Remember Him' is no classic, but it's full of good things. . . The tone throughout is that of a humanist scholar, touched slightly with the crotchets of an eighteenth-century gentleman, all based on the foundation of a true passion for scientific investigation. Those who are interested in the progress of medicine will get most from its pages, but its audience should not be limited to these." Clifton Fadiman

+ — **New Yorker** 16:69 Je 29 '40 1100w

"Practically all Professor Zinsser's adventures are entertaining in themselves, but what makes the book go is the just and brilliant comment on men and things as he has found them. Few people judge so wisely or so gleaningly. His unconventional verdicts are apt, even-handed, penetrating, and except for one or two rather bitter asides, full of comprehending kindness that is never sloppy." Leonard Bacon

+ **Sat R of Lit** 22:6 Je 29 40 800w

"Here, under provocative and typically Zinsserish chapter headings that foretell the contents of the ensuing pages, is delicious humor that will make the reader laugh outright; canny reflections on humanity with all its frailties, endearing qualities, and noble attributes; profound wisdom that is immediately discounted by the author lest his 'alter ego' appear too clever or pedantic."

+ **Scientific Bk Club R** 11:2 My '40 400w

"In his previous book, Rats, Lice and History, Zinsser showed that he was an able popular writer. The present volume reveals him as a vivid and many-sided personality. It is also very enjoyable reading, full of good stories alternating with shrewd comments and reflections on science, education, and life in general." Julian Huxley

ZINSSER, HANS—*Continued*

Wis Lib Bul 36:137 O '40

"Now and then, but not nearly often enough, there comes a book which captivates the reader with a quality of playfulness while yet impressing him with its wisdom and understanding. 'Alice in Wonderland' was such a book, and 'The Wind in the Willows,' and 'The Crock of Gold.' Hans Zinsser's story of himself, objectified as the apocryphal R.S., is so similar in spirit to these classics of literary charm that this reviewer must risk the fate which is apt to befall him who mentions an excellent new book in the same breath with an excellent old one. Indeed, he risks it blithely because he is confident that anyone who reads this book will almost certainly succumb to its rare and disarming vigor and grace." J. H. Bradley

"This book is a sound contribution to public personnel literature in the United States. If it has any weakness, it is that of being guided too much by the method commonly ascribed to 'science' and not evaluating the future possibilities of a number of important aspects of government strikes, such as those of public relief workers. Perhaps the application of a little more historical insight might have made this painstaking work that much more valuable." H. F. Alderfer

ZNANIECKI, FLORJAN. The social role of the man of knowledge. 212p $2.50 Columbia univ. press

301.15 Learning and scholarship. Sociology. Social psychology 41-534

"A scholarly book written by a scholar about scholars, rather generally describes Professor Znaniecki's exposition of 'that particular set of borderland problems that has recently been termed "the sociology of knowledge."' Writing of scientists as individuals who specialize in cultivating knowledge, and using the word 'scientist' in its true etymological sense as derived from *scire*, 'to know,' he defines the essential components of social rôles and the particular part performed by the scientist." (Scientific Bk Club R) Index.

"A comprehensive study of the social functions of knowledge has been needed for some time, and Prof. Znaniecki is to be congratulated upon a valuable introduction to the subject. In two hundred pages of well-written material he surveys both historically and analytically the different types of knowledge and of its exponents, as viewed from a sociological standpoint." R. E. K. "This book is not to be considered by any means a 'first reader' in television, although it is undoubtedly a mine of information on modern practice in this new field. However, it is apparently written for the person who already is aware of the principles of the subject and of the difficulties that have to be overcome; it is by no means a book to be used by a class beginning the subject... One criticism, which may be just a matter of personal allergy on the part of the reviewer, is that among the abundance of useful illustrations the authors have chosen to include about seventy reproductions of photographs of rooms and apparatus... The book will undoubtedly occupy an important place in every laboratory having to do with any form of electronic research." E. F. Burton
